OUR MISSION

The Oneota Conservation Foundation was formed in cooperation with the Clay County Conservation Board in October 2005. It was established in response to public concern over the rapid decline of woodlands, prairies, wetlands, and other natural areas. The goals are as follows:

- Promote environmental education and the awareness of natural resource conservation.
- Facilitate the acquisition and maintenance of public areas in Clay County.
- Support outdoor recreation and camping areas in the county.

Contributions to the Foundation will also advance environmental education. As wild natural areas become increasingly scarce, their importance grows. Education regarding the plants and animals and the complex interactions of nature are important topics which the Foundation proposes.

The Friends of Oneota Conservation Foundation, a 501 (c (3) organization, is embarking on an exciting fundraising campaign to build the Oneota Environmental Learning Center. Nature is Calling, make a donation towards “no child left indoors”. Contribute to our quest to educate and connect generations naturally. We hope to see this exciting and stimulating facility completed as soon as possible with kids of all ages running in and out and all about at the Oneota Environmental Learning Center.
